# AmberAir Compact CX:

## EXCEPTIONAL AIR HANDLING UNIT FOR YOUR PROJECT!

AmberAir Compact series offers combined flexibility of modular units and production speed of standardized units. 3D selection software makes modeling easy: select your unit from more than 4000 combinations and transfer directly to the ventilation system design drawings. Perfected construction leads to higher overall AHU efficiency approved by test results at independent laboratories. We guarantee extended durability, airtightness, thermal efficiency and smooth performance under European climatic conditions!

### REASONS TO CHOOSE

AmberAir Compact

#### Customised air handling solution:

- › Airflow up to 9000 m<sup>3</sup>/h;
- › Selectable components.

#### Reliability:

- › Tested at conditions -35° C to +40° C, RH90%;
- › Eurovent certification.

#### Hygienic level design:

- › High draining efficiency—98% (5 l/m<sup>2</sup> at 20 min);
- › Convenient servicing.

#### High energy efficiency:

- › Heat recovery up to 92%.

### AmberAir Compact CX

CREATES A PERFECT INDOOR CLIMATE IN:

Schools

Offices

Retail stores

Public buildings

Industry

Hotels

### ADDITIONAL BONUSES FOR RECONSTRUCTION PROJECTS!

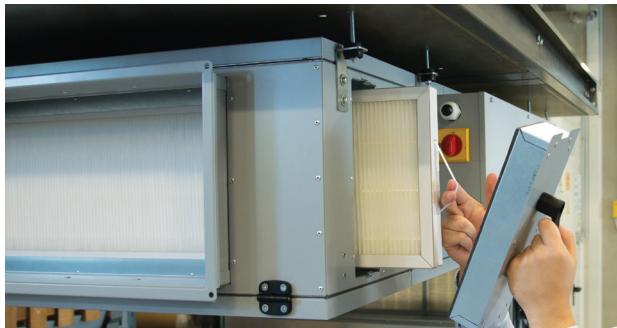

You will easily find a place for an AmberAir Compact:

- › Compact sizing for internal transportation and mounting in existing premises;
- › Ceiling units can be installed under suspended ceilings due to their low height;
- › All AmberAir Compacts are designed for outdoor installation with proper covering from precipitation;
- › Silent performance makes the installation nearby working zones possible.

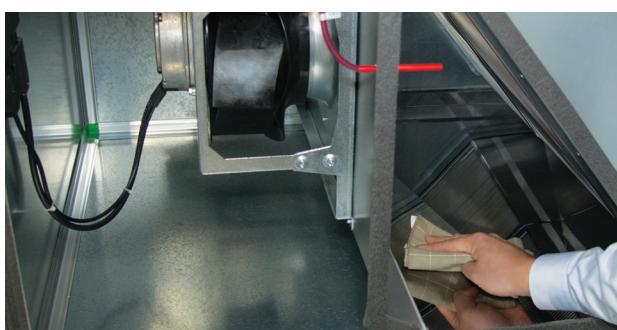

# SERVICE FRIENDLY DESIGN

## ENSURES THE PERFECT INDOOR CLIMATE

One of the main tasks in developing AmberAir Compact was to ensure easy servicing and cleaning.

› **Filter change.** Filter pollution is monitored by pressure switches. Filters are easily removable: in the CXP series there's even no need to remove the cover. This is critical when the unit hangs under the ceiling.

› **Cleaning.** Internal surfaces are easily accessible and resistant to most cleaners and disinfectants.

› **Component removal.** Components are conveniently removable for inspection. All of them can be changed with standard tools.

Easy and convenient servicing ensures long service life and low maintenance costs.

## FIVE EFFICIENCY BONUSES

AmberAir Compact CXH provides the top energy savings in its class:

Up to 92% heat recovery

Efficient EC fans

External leakage<1%

Demand control ready ventilation\*

Modulating control electrical heater

\* RH sensor is integrated only in the CXP series; for other AmberAir Compact units it is available as an accessory with the other comfort sensors

# SMART AIR HANDLING

AmberAir Compact AHU is controlled by a remote panel, Ethernet, or mobile application. The unit can be connected to the BMS (building management system) via Modbus or BACnet/IP. The entire AHU has a demand level control option via comfort sensors such as CO<sub>2</sub>, RH, presence detectors.

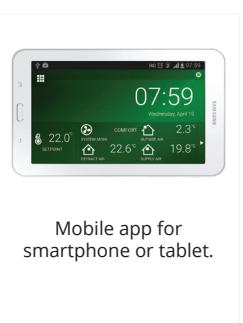

Connection to Ethernet:  
via MB-Gateway

Control panel

Demand ready control:  
integrated RH sensor  
(CXP) or optional CO<sub>2</sub> or  
presence sensors.

Mobile app for  
smartphone or tablet.

Connection to BMS via  
Modbus or BACnet/IP  
(via MB-Gateway) protocols

This set of functions ensures convenient air handling and a comfortable indoor climate and saves up to 30% electricity.

4 system modes

# QUALITY

CONFIRMED BY EXTENSIVE TESTING

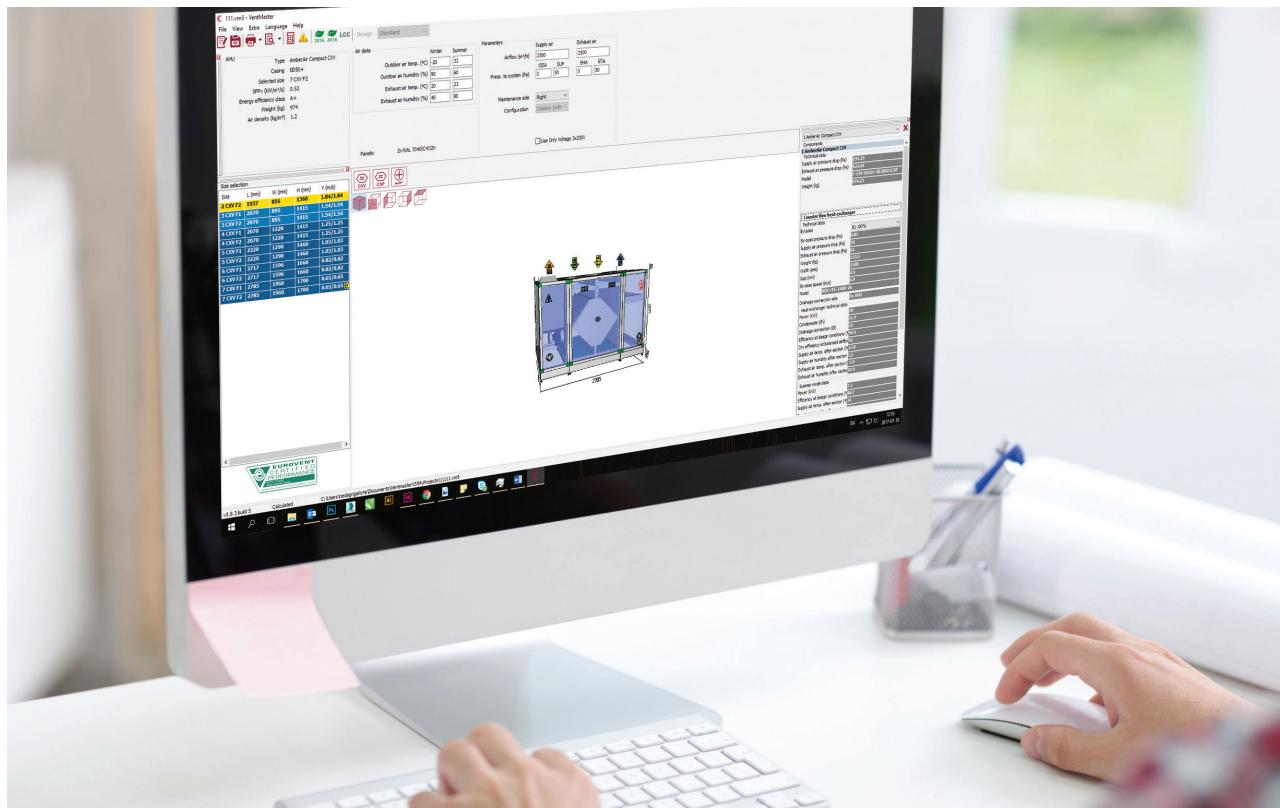

Every AmberAir Compact unit went through testing in order to guarantee smooth performance in any conditions:

- › Climatic chamber: thermal efficiency and performance at climate conditions of -35° C - +40° C, 90% RH and anti-frost protection of the heat exchanger;
- › Multi tube airflow measurement chamber: aerodynamic characteristics of fans;
- › Noise chamber: determination of sound power level.

## SMART SELECTION OF SOFTWARE VENTMASTER V5

AmberAir Compact CX selection and modeling is easy with VentMaster:

- › 3D modelling;
- › Automatic heater capacity selection;
- › Online price calculation and ordering (for registered users);
- › Export of drawing in .DXF file;
- › Export of drawing and technical data to Autodesk Revit;
- › LCC calculation.

Select the most suitable solution by using an LCC calculator that includes:

- › Primary investment;
- › Electricity consumption of fans;
- › Electricity, fuel or hot water consumption of heating elements.

**Software is free of charge.**

Go to [www.salda.lt](http://www.salda.lt) to get your VentMaster.

# AmberAir Compact CXV

## APPLICATION

Offices, stores, hotels, industry or other heated premises (classrooms, apartments, conference rooms, etc.)

## DESCRIPTION

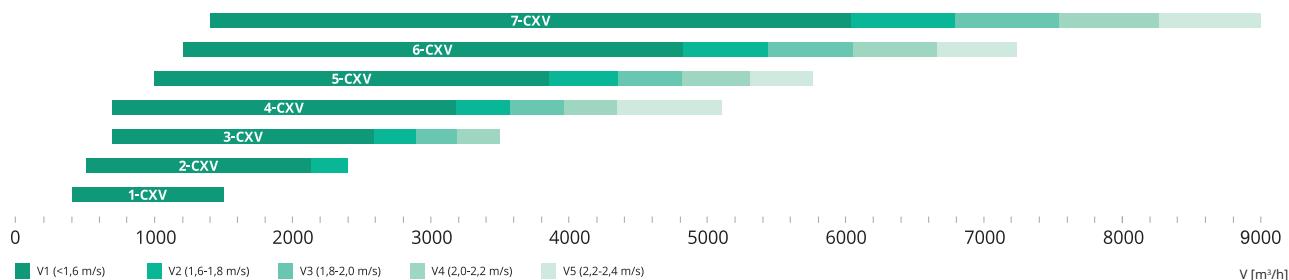

The AmberAir Compact CXV is designed to fulfil a client's desire for a reliable, efficient, commercial compact air handling unit with the flexibility of modular units. Certified selection software of VentMaster allows the design of a desired unit from a set of different components: fans, heaters, by-pass dampers, filters, etc.

## REMOTE CONTROL

Four remote control options are available:

- › Stouch remote controller.
- › Flex MCB.
- › Building management system connections MODBUS, BACnet/IP.
- › Remote control via PC MB-Gateway (TPC/IP).
- › SaldaAir app via MB-Gateway and WiFi.

## AIR FLOW DIAGRAM

## PRODUCT CODE

	AmberAir Compact	3	CX	V	SD50+	R	F1	B1	W1	C1	P
<b>Product range - trademark</b>											
<b>Unit size:</b> 1 – first size; 7 - last size.											
<b>Heat exchanger:</b> CX – counter-flow.											
<b>Casing:</b> V – vertical.											
<b>Model box:</b> SD50+ – premium;											
<b>Service side:</b> R – right, L – left											
<b>Fan type:</b> F1 – standard; F2 – more powerful; F3 – standard 3x230V; F4 – more powerful 3x230V											
<b>Bypass damper:</b> B1 – 100%*; B2 – 100% with recirculation; B3 – segmented.											
<b>Heater:</b> W1/W2 – water (1 – lower capacity, 2 – higher capacity); E1/E2/E3/E4 – electrical (1 – lower capacity, 2 – higher capacity, 3 – lower capacity 3x230V, 4 – higher capacity 3x230V).											
<b>Control:</b> C1 – MCB control board; C2 – prewiring only; C3 – MCB + 3x230V											
<b>Filter:</b> P – panel; B – bag.											

\* - 100% means, that bypass damper separates airflows completely: all the supply airflow goes only through heat exchanger or only through bypass. The airflow though by-pass might be lower than maximal supply airflow of the unit.

## FEATURES

- › Customized compact air handling unit with selectable components.
- › Top quality SD50+ casing: thermal bridging (TB2) and airtightness in the market (L1).
- › Maintenance friendly: wide access via hinged doors and simple component removal.
- › High efficiency: up to 92% heat recovery, new generation EC fans, smart demand ready control, 0-10V modulating controlled integrated electrical heater.
- › Outdoor version as a standard in all European climate zones: tested in a climatic chamber.
- › Easy 3D modelling and selection software VentMaster with export to .dxf or Autodesk Revit.

## OPERATING CONDITIONS

Outdoor air temperature without preheater (Salda Antifrost** off):	-5°/+40° C*
Outdoor air temperature without preheater (Salda Antifrost** on):	-15°/+40° C
Outdoor air temperature with 100% by-pass***:	-23°/+40° C
Outdoor air temperature with segmental by-pass***:	-30°/+40° C
Outdoor air temperature limits with a selected pre-heat- er on an air duct:	-40°/+40° C
Outdoor air max humidity:	90%
Temperature limits of an extracted air:	+15°/+40° C
Extract air max humidity:	60%
Maximum room temperature for installing the unit:	+40° C

\* - when relative humidity of extracted air is lower than 35 %.

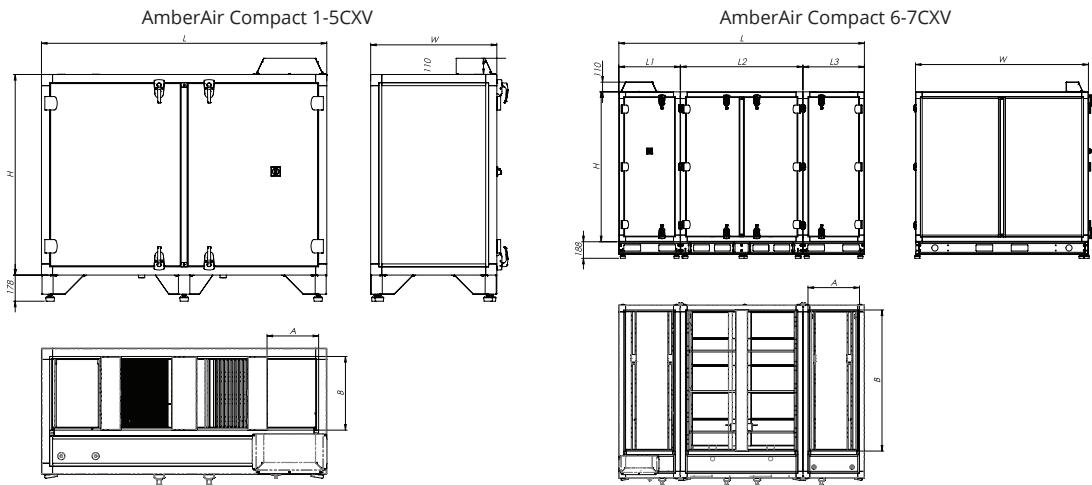

\*\* – uses dis-balancing of the airflow and it may cause negative pressure in premises.

\*\*\* – depends on AHU configuration.

## CONSTRUCTION

### 1. Counter-flow aluminium heat exchanger:

- Efficiency up to 92%;
- Separated supply and exhaust air: virtually no moisture transfer, no mixing;
- Low maintenance;
- Pressure relays – anti-frost protection for heat exchanger.

### 2. Integrated advanced MCB control board:

- Demand control ready ventilation;
- Control by remote controllers, PC via MB-Gateway, SaldaAir application via WiFi or BMS (ModBus, BACnet/IP);
- Fire damper control and testing;
- El. heater/preheater 0-10V control;
- Water heater/preheater control and protection;
- DX/water cooler, air damper control;
- Constant airflow mode.

### 3. SD50+ casing features:

- Galvanized steel with powder coating panels;
- Aluminium frame;
- Thermal insulation: polyurethane 45 mm;
- Thermal breaking profiles with 25 mm plastic strips;
- Profiles internally rounded for easy cleaning.

### 4. 3 bypass types: 100%, with recirculation or segmented.

### 5. Efficient EC fans with backward curved impellers: 2 versions for each size.

### 6. Stainless steel drip tray – high draining efficiency – up to 98%.

### 7. 4 air temperature sensors (supply, extract, outdoor and exhaust).

### 8. Heater:

- Integrated modulating control electric heater (signal 0-10V);
- Integrated water heater. Available accessories for anti-frost protection.

### 9. Filters:

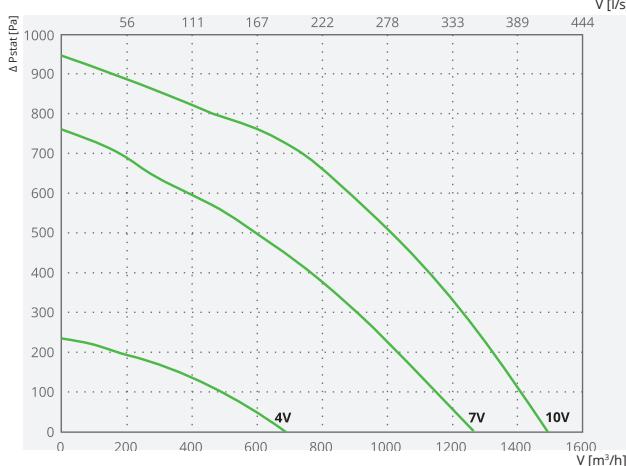

- Stitched pocket filters (external box) or panel filters (integrated);
- Class: Coarse 65% (G4), ePM<sub>10</sub> 55% (M5), ePM<sub>1</sub> 70% (F7);
- Filter pollution monitoring: pressure switches.

## FUNCTIONS

Description of the functions	MCB	
	E	W
System modes	●	
BOOST function	●	
Cold/heat recovery	●	
Supply air temperature control and compensation	●	
Weekly schedule	●	
Holiday schedule	●	
Night cooling function	●	
CO2 level reduction function	○	
RH level reduction	○	
Dryness protection	○	
Constant air pressure	●	
Constant airflow mode	●	
Heat exchanger frost protection	●	
Manual components control	●	
Fire place function	●	
Fireplace protection (NC)	○	
Fire protection from the external contact	○	
Winter/summer mode	●	
System monitoring	●	
Alarm indication output	●	
Operation indication output	●	
Digital input configuration	●	
Event register (storing up to 50 entries)	●	
Date and time settings	●	
Reset to factory defaults	●	
Air dampers		
Supply/exhaust air dampers control	●	
Fans		
Supply/exhaust air fan fault indication (NC)	●	
Protection by RPM	●	
Protection by pressure	●	
Sensors		
Supply air temperature sensor	●	
Outdoor air temperature sensor	●	
Extract air temperature sensor	●	
Exhaust air temperature sensor	●	
Water heater temperature sensor	-	●
Water pre-heater temperature sensor	-	○
Water cooler temperature sensor	○	
Electric heater		
On/off and 0-10V control	●	-
Automatic and Manual protection (NC)	●	-
Electrical pre-heater		
On/off (PWM) and 0-10V control	●	●*

# AmberAir Compact CXV

## FUNCTIONS

Description of the functions		MCB
	E	W
<b>Fire alarm damper</b>		
	Fire valves control (on/off)	●
	Fire valves testing	●
<b>DX cooler</b>		
	On/off and 0-10V control	●
	DX cooler breakdown indication (NC)	●
	DX cooler operation switching (NO – cooling; NC – heating)	●
<b>Recirculation</b>		
	3P and 0-10V valve control	●
	Recirculation stepped motor control	●
<b>Bypass damper</b>		
	3P and 0-10V damper control	●
	Bypass damper stepped motor control	●
<b>Remote controllers</b>		
	S-Touch	x
	Flex MCB	x
	MB Gateway	x
<b>Building management system</b>		
	Modbus	●
	BACnet/IP	○

- Required additional components: CO2 and moisture sensors, switches, etc.
- Standard feature (the number of features depends on the ventilation unit in which the automatics are used); to be configured through BMS network or remote control console
- x Remote control consoles
- \* The possibility to connect water or electrical pre-heater

## REMOTE CONTROL OPTIONS

Google Play store:

iTunes App store:

**Salda Air**

mobile application: smart indoor climate control solution!

# AmberAir Compact CXH

## APPLICATION

Offices, stores, hotels, industry or other heated premises (classrooms, apartments, conference rooms, etc.)

## DESCRIPTION

The AmberAir Compact CXH is designed to fulfil a client's desire for a reliable, efficient, commercial compact air handling unit with the flexibility of modular units. Certified selection software of VentMaster allows the design of a desired unit from a set of different components: fans, heaters, by-pass dampers, filters, etc.

## REMOTE CONTROL

Four remote control options are available:

- › Stouch remote controller.
- › Flex MCB.
- › Building management system connections MODBUS, BACnet/IP.
- › Remote control via PC MB-Gateway (TPC/IP).
- › SaldaAir app via MB-Gateway and WiFi.

## FEATURES

- › Customized compact air handling unit with selectable components.
- › Top quality SD50+ casing: thermal bridging (TB2) and airtightness in the market (L1).
- › Tested at independent laboratories.
- › Maintenance friendly: wide access via hinged doors and simple component removal.
- › High efficiency: up to 92% heat recovery, new generation EC fans, smart demand ready control, 0-10V modulating controlled integrated electrical heater.
- › Outdoor version as a standard in all European climate zones: tested in a climatic chamber.
- › Easy 3D modelling and selection with export to .dxf or Autodesk Revit.

## OPERATING CONDITIONS

Outdoor air temperature without preheater (Salda Antifrost** off):	-5°/+40° C*
Outdoor air temperature without preheater (Salda Antifrost** on):	-15°/+40° C
Outdoor air temperature with 100% by-pass***:	-23°/+40° C
Outdoor air temperature with segmental by-pass***:	-30°/+40° C
Outdoor air temperature limits with a selected pre-heat- er on an air duct:	-40°/+40° C
Outdoor air max humidity:	90%
Temperature limits of an extracted air:	+15°/+40° C
Extract air max humidity:	60%
Maximum room temperature for installing the unit:	+40° C

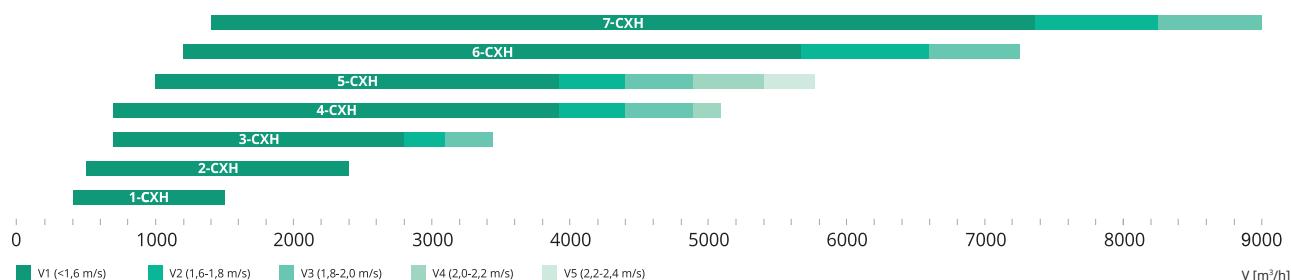

\* – when relative humidity of extracted air is lower than 35 %.

\*\* – uses dis-balancing of the airflow and it may cause negative pressure in premises.

\*\*\* – depends on AHU configuration.

## AIR FLOW DIAGRAM

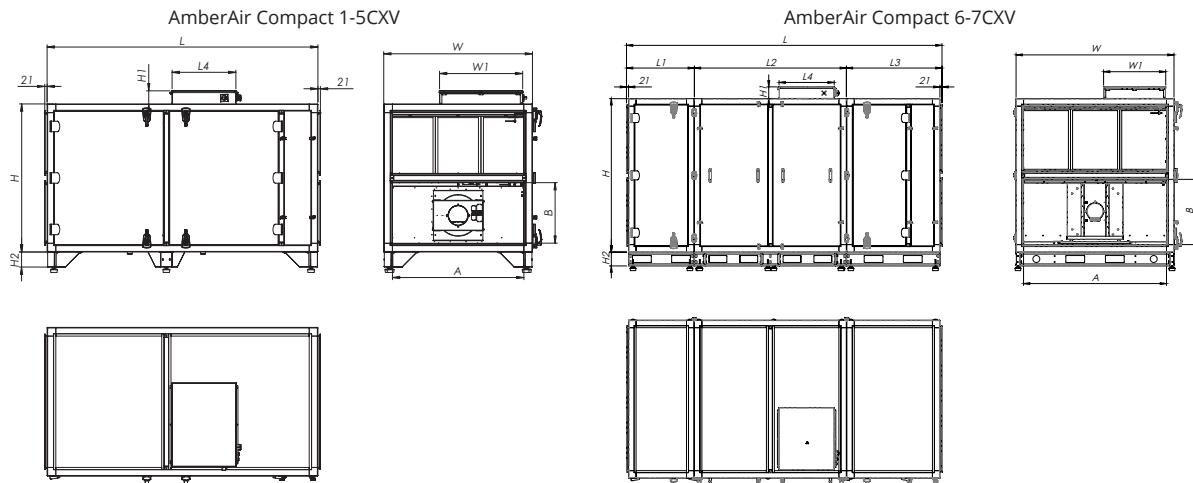

## PRODUCT CODE

AmberAir Compact	3	CX	H	SD50+	R	F1	B1	W1	C1	P
Product range - trademark										
Unit size: 1 – first size; 7 - last size.										
Heat exchanger: CX – counter-flow.										
Casing: H – horizontal.										
Model box: SD50+ – premium;										
Service side: R – right, L – left										
Fan type: F1 – standard; F2 – more powerful; F3 – standard 3x230V; F4 – more powerful 3x230V										
Bypass damper: B1 – 100%*; B2 – 100% with recirculation; B3 – segmented.										
Heater: W1/W2 – water (1 – lower capacity, 2 – higher capacity); E1/E2/E3/E4 – electrical (1 – lower capacity, 2 – higher capacity, 3 – lower capacity 3x230V, 4 – higher capacity 3x230V).										
Control: C1 – MCB control board; C2 – prewiring only; C3 – MCB + 3x230V.										
Filter: P – panel; B – bag.										

\* - 100% means, that bypass damper separates airflows completely: all the supply airflow goes only through heat exchanger or only through bypass. The airflow though bypass might be lower than maximal supply airflow of the unit.

## CONSTRUCTION

### 1. Counter-flow aluminium heat exchanger:

- Efficiency up to 92%;
- Separated supply and exhaust air: virtually no moisture transfer, no mixing;
- Low maintenance;
- Pressure relays – anti-frost protection for heat exchanger.

### 2. Integrated advanced MCB control board:

- Demand control ready ventilation;
- Control by remote controllers, PC via MB-Gateway, SALDA AIR application via WiFi or BMS (ModBus, BACnet);
- Fire damper control and testing;
- El. heater/preheater 0-10V control;
- Water heater/preheater control and protection;
- DX/water cooler, air damper control;
- Constant airflow mode.

### 3. SD50+ casing features:

- Galvanized steel with powder coating panels;
- Aluminium frame;
- Thermal insulation: polyurethane 45 mm;
- Thermal breaking profiles with 25 mm plastic strips;
- Profiles internally rounded for easy cleaning.

### 4. 3 bypass types: 100%, with recirculation or segmented.

### 5. Efficient EC fans with backward curved impellers: 2 versions.

### 6. Stainless steel drip tray – high draining efficiency – 98% (5 l/m² at 20 min).

### 7. 4 air temperature sensors (supply, extract, outdoor and exhaust).

### 8. Heater:

- Integrated modulating control electric heater (signal 0-10V);
- Integrated water heater. Available accessories for anti-frost protection.

### 9. Filters:

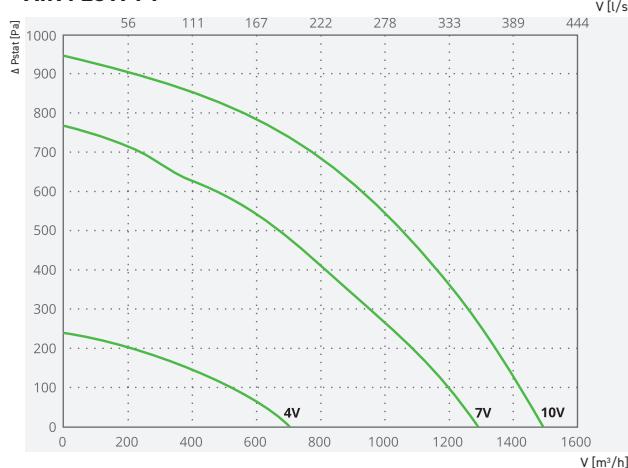

- Stitched pocket filters (external box) or panel filters (integrated);
- Class: Coarse 65% (G4), ePM<sub>10</sub> 55% (M5), ePM<sub>1</sub> 70% (F7);
- Filter pollution monitoring: pressure switches and timer.

- Required additional components: CO2 and moisture sensors, switches, etc.
- Standard feature (the number of features depends on the ventilation unit in which the automatics are used); to be configured through BMS network or remote control console
- x Remote control consoles
- \* The possibility to connect water or electrical pre-heater

## REMOTE CONTROL OPTIONS

Google Play store:

iTunes Apple store:

## Salda Air

mobile application: smart indoor climate control solution!

# AmberAir Compact CXP

## FEATURES

- › Installation options: ceiling or ground, indoors or outdoors;
- › Easy filter changes from the side without opening doors;
- › Optional components: two sizes of integrated water or electrical heaters, with various class pocket or panel filters and left/right service sizes;
- › Tested at independent laboratories: a climatic performance test for temperatures ranging from -35°C to +40°C;
- › High efficiency: up to 90% heat recovery, new generation EC fans, smart control, and a 0-10V modulating controlled integrated electrical heater;
- › Demand control level with an integrated humidity sensor;
- › Certified by Eurovent Certita Certification.

## APPLICATION

Offices, stores, hotels, industry or other heated premises (classrooms, apartments, conference rooms, etc.)

## DESCRIPTION

The AmberAir Compact CXP is a new generation of ceiling air handling units with an advanced casing and unique maintenance solution, which allows the installation of a unit indoors or outdoors (with optional roofing) and under the ceiling or on the ground. The extended airflow range (up to 3900 m<sup>3</sup>/h) enables them to substitute for traditional horizontal and vertical units in order to save space on the ground for other equipment.

## REMOTE CONTROL

Four remote control options are available:

- › Stouch remote controller.
- › Flex MCB.
- › Building management system connections MODBUS, BACnet/IP.
- › Remote control via PC MB-Gateway (TPC/IP).
- › SaldaAir app via MB-Gateway and WiFi.

## OPERATING CONDITIONS

Outdoor air temperature without preheater (Salda Antifrost** off):	-5°/+40° C*
Outdoor air temperature without preheater (Salda Antifrost** on):	-15°/+40° C
Outdoor air temperature with 100% by-pass***:	-23°/+40° C
Outdoor air temperature limits with a selected pre-heat- er on an air duct:	-40°/+40° C
Outdoor air max humidity:	90%
Temperature limits of an extracted air:	+15°/+40° C
Extract air max humidity:	60%
Maximum room temperature for installing the unit:	+40° C

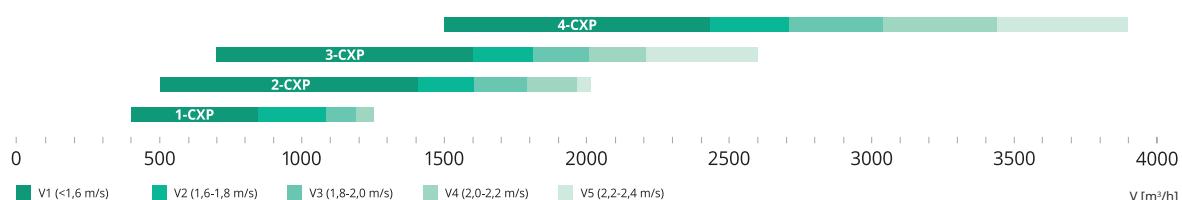

\* – when relative humidity of extracted air is lower than 35 %.

\*\* – Uses dis-balancing of the airflow and it may cause negative pressure in premises.

\*\*\* – depends on AHU configuration.

## AIR FLOW DIAGRAM

## PRODUCT CODE

### AmberAir Compact

Product range - trademark

3 CX P SD50+ R F1 B1 W1 C1 P

**Unit size:** 1 – first size; 7 – last size.

**Heat exchanger:** CX – counter-flow.

**Casing:** P – ceiling.

**Model box:** SD50+ – premium;

**Service side:** R – right, L – left

**Fan type:** F1 – standard; F2 – more powerful; F3 – standart 3x230V; F4 – more powerful 3x230V

**Bypass damper:** B1 – 100%\*

**Heater:** W1/W2 – water (1 – lower capacity, 2 – higher capacity);

E1/E2/E3/E4 – electrical (1 – lower capacity, 2 – higher capacity, 3 – lower capacity 3x230V, 4 – higher capacity 3x230V).

**Control:** C1 – MCB control board; C3 – MCB + 3x230V.

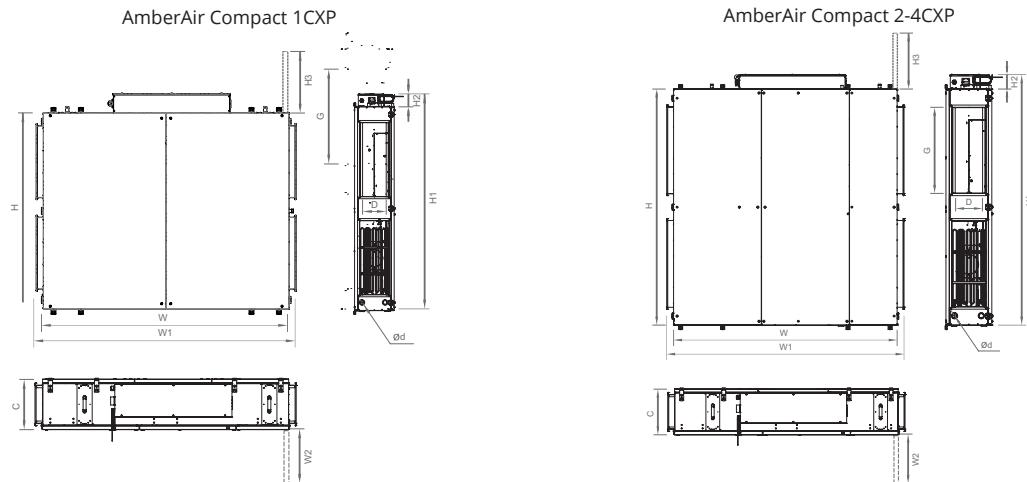

**Filter:** P – panel; B – bag.

\* - 100% means, that bypass damper separates airflows completely: all the supply airflow goes only through heat exchanger or only through bypass. The airflow though by-pass might be lower than maximal supply airflow of the unit.

## CONSTRUCTION

### 1. Counter-flow aluminium heat exchanger:

- Efficiency up to 90%;
- Separated supply and exhaust air: almost no moisture transfer, no mixing;
- Low maintenance;
- Pressure relays – additional anti-frost protection for heat exchanger.

### 2. Integrated advanced MCB control board:

- Demand control ready ventilation;
- Control by remote controllers, PC via MB-Gateway or BMS (ModBus, BACnet);
- Fire damper control and testing;
- El. heater/preheater 0-10V control;
- Water heater/preheater control and protection;
- DX/water cooler, air damper control;
- Constant airflow mode.

### 3. Double-skinned casing panels:

- Galvanized steel powder coated corrosion class – C3.

### 4. Panel (integrated) or pocket (external box) filters:

- Class: Coarse 65% (G4), ePM<sub>10</sub> 55% (M5), ePM<sub>1</sub> 70% (F7);
- Fully recyclable;
- Supply/extract filter pressure switch.

### 5. 100% motorized by-pass damper.

### 6. EC fans with a backwards curved impeller.

### 7. Heater:

- Integrated modulating control electric heater (signal 0-10V);
- Integrated water heater.

### 8. 3 air temperature sensors (supply, outdoor and exhaust).

### 9. DTJ – humidity - temperature sensor.

# AmberAir Compact CXP

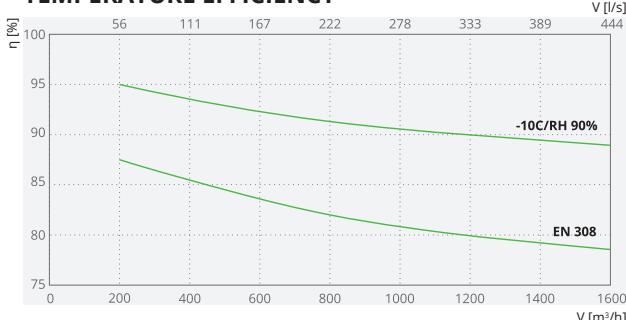

## AmberAir Compact 1-CXPE/W

Performance  
(with clean filter)

### AIR FLOW F1

### TEMPERATURE EFFICIENCY

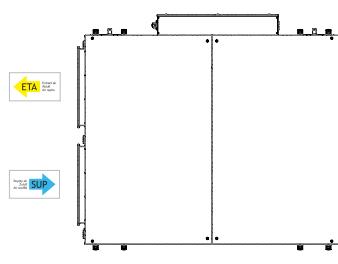

Temperature efficiency (-10°C/RH 90):  
Extract air = extract air: +20°C/RH 60%  
Outdoor air = outdoor air: -10°C/RH 90%

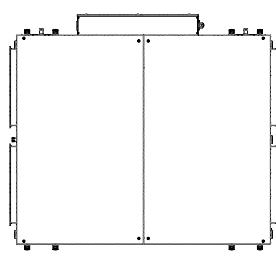

EN 308 :

Extract air = extract air: +25°C/RH27%  
Outdoor air = outdoor air: +5°C/RH80%

## FUNCTIONS

Description of the functions		MCB
	E	W
System modes	●	
BOOST function	●	
Cold/heat recovery	●	
Supply air temperature control and compensation	●	
Weekly schedule	●	
Holiday schedule	●	
Night cooling function	●	
CO2 level reduction function	○	
RH level reduction	●	
Dryness protection	●	
Constant air pressure	●	
Constant airflow mode	●	
Heat exchanger frost protection	●	
Manual components control	●	
Fire place function	●	
Fireplace protection (NC)	○	
Fire protection from the external contact	○	
Winter/summer mode	●	
System monitoring	●	
Alarm indication output	●	
Operation indication output	●	
Digital input configuration	●	
Event register (storing up to 50 entries)	●	
Date and time settings	●	
Reset to factory defaults	●	
Air dampers

## FUNCTIONS

Description of the functions		MCB
	E	W
<b>Fire alarm damper</b>		
	Fire valves control (on/off)	●
	Fire valves testing	●
<b>DX cooler</b>		
	On/off and 0-10V control	●
	DX cooler breakdown indication (NC)	●
	DX cooler operation switching (NO – cooling; NC – heating)	●
<b>Recirculation</b>		
	3P and 0-10V valve control	●
	Recirculation stepped motor control	●
<b>Bypass damper</b>		
	3P and 0-10V damper control	●
	Bypass damper stepped motor control	●
<b>Remote controllers</b>		
	S-Touch	x
	Flex MCB	x
	MB Gateway	x
<b>Building management system</b>		
	Modbus	●
	BACnet/IP	○

○ Required additional components: CO2 and moisture sensors, switches, etc.  
 ● Standard feature (the number of features depends on the ventilation unit in which the automatics are used); to be configured through BMS network or remote control console  
 x Remote control consoles  
 \* The possibility to connect either a water or electrical pre-heater

# MB-Gateway

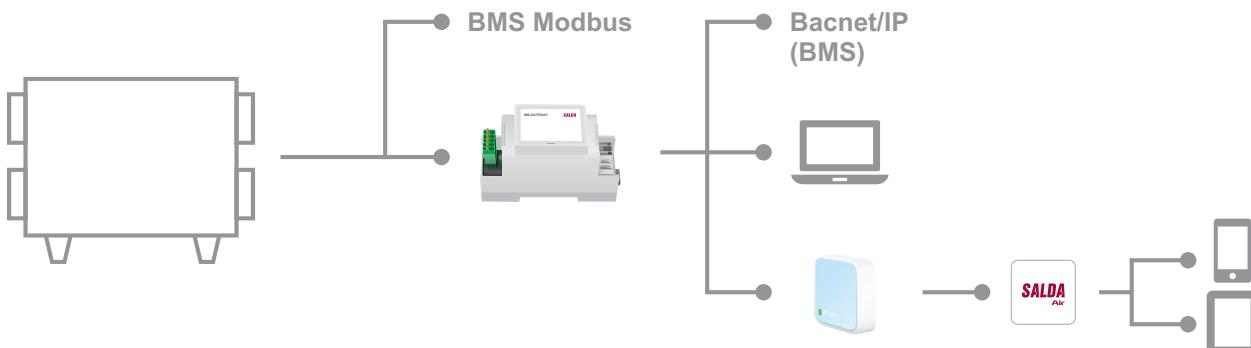

## NETWORK MODULE

Title	Article No.
MB-Gateway	PRGPU082

MB-Gateway enables ventilation units, based on control technology produced by Salda, to connect via TCP/IP to the wide range of control devices.

- › Remote air handling unit's control via PC through the home network or internet;
- › A three-level menu: user/service/adjuster;
- › User friendly, multilingual and up-to-date interface;
- › Informative interface screen on your control unit: temperature, operation modes, fan speed, date/time, extract/outdoor air temperature, humidity.
- › Easy adjustment of control board settings: fan speed, temperature, boost, calendar event, humidity, CO<sub>2</sub> level and etc.

### TECHNICAL DATA:

- › TCP/IP Modbus gateway;
- › BACnet/IP gateway;
- › IPv4 protocol;
- › DHCP protocol;
- › NetBIOS/hostname;
- › WEB server;
- › FTP server;
- › Formation of Modbus commands/responses to HTTP queries;
- › authorised login;
- › automated data transmission between Modbus devices;
- › data logger;
- › date/time synchronization;
- › module software upgrading through the microSD memory card (the upgrade can also be written through the FTP client);
- › RTC;
- › galvanically insulated RS485 communications line.

### TECHNICAL DATA

Mounting	Surface, DIN Rail	
Voltage	[AC/DC]	12V - 25V (2W) (supplied with AC/DC adapter)
Communication line		Ethernet RJ45 ModBus RS485
Cable length	[m]	UTP cable (0.5 m) RS485 communication cable with RJ11 plugs (2 m)
Dimensions (WxHxD)	[mm]	90x62x58
Protection class		IP-20
Ambient temperature	[°C]	-20 - 70
Ambient humidity	[%]	30-85 (without condensation)

## WIRELESS NANO ROUTER

## DOWNLOAD SALDA AIR!

Google Play store:

iTunes Apple store:

Title	Article No.
TL-WR802N	PRGPU105

300Mbps Wireless Nano Router TL-WR802N Purpose:

- › Wireless connection device of the SALDA AHU to existing TCP/IP network by Repeater mode;
- › Access point for wireless control of SALDA AHU via smartphone, tablet, PC or similar device.

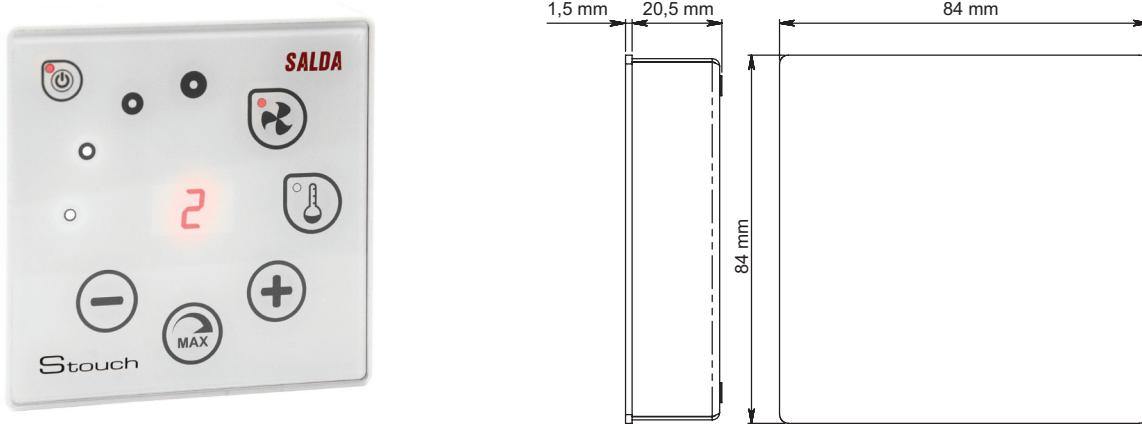

### INTERFACE:

- › 1 10/100Mbps WAN/LAN Port;
- › 1 Micro USB Port;
- › 1 Reset Button.

### TECHNICAL DATA

External Power Supply	[V/A]	5V/1A
Wireless Standards		IEEE 802.11n, IEEE 802.11g, IEEE 802.11b
Dimensions ( W x D x H )	[in/mm]	2.2 x 2.2 x 0.7/57 x 57 x18
Antenna Type		On-Board
Wireless Modes		Router Mode, Repeater Mode, Client Mode, AP Mode, WISP Router Mode
System Requirements		Microsoft® Windows® 98SE, NT, 2000, XP, Vista™, Windows 10/8.1/8/7, MAC®OS, NetWare®, UNIX® or Linux.
Operating Temperature:	[°C/°F]	0 ~ 40/32~104
Storage Temperature	[%]	40~70/40~158
Operating Humidity	[%]	10%~90% non-condensing
Storage Humidity	[%]	5%~90% non-condensing

## REMOTE CONTROLLER

Title	Article No.
Stouch	PRGPU051

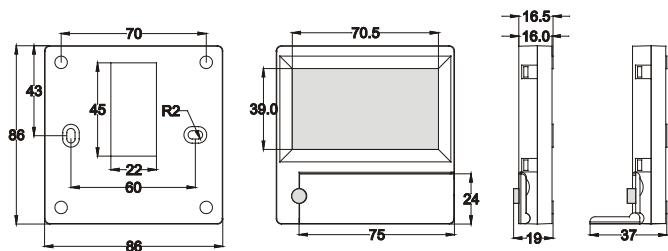

Stouch controllers specially designed for easy control of Salda Air handling units.

- › No complex features: ideal for facilities with occasional or novice users (e.g. hotels, offices, schools and etc.);
- › 4 configurable speeds (indicated pressure or velocity as a percentage);
- › Boost function;
- › On/Off function;
- › Display of fan speed;
- › Display of warnings;
- › Constant pressure control with external pressure sensor;
- › Carbon dioxide level control with external CO2 sensor;
- › Modbus master/slave modes;
- › One-touch sensory control, sound response;
- › LED and digital indication;
- › Sleep mode;
- › Blocking of turn off;
- › Child lock.

# CO<sub>2</sub>

## CO<sub>2</sub> SENSORS

S-RCO2-F2

Title	Article No.
S-RCO2-F2	ZAKKT0048

S-KCO2

Title	Article No.
S-KCO2	ZAKKT0049

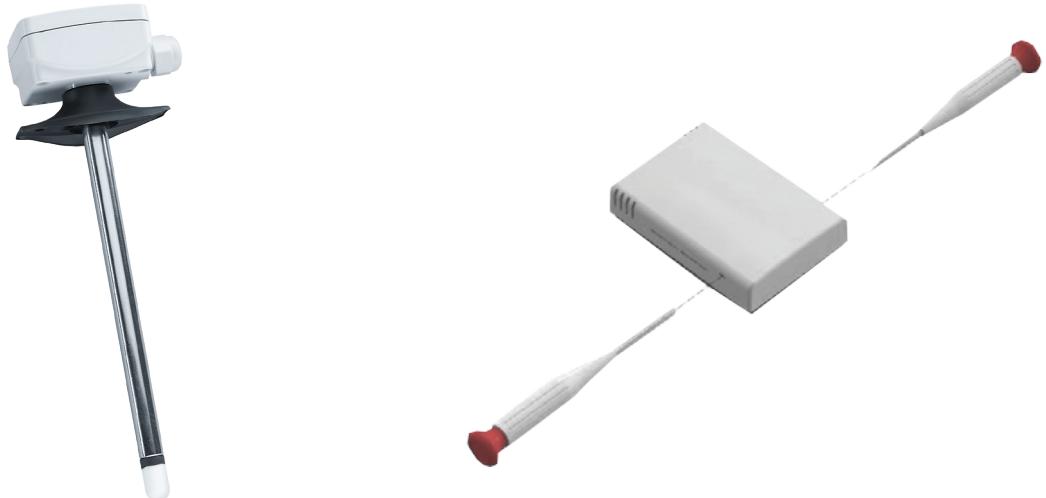

The self-calibrating microprocessor-controlled room and duct CO<sub>2</sub> sensors are used for the detection of the CO<sub>2</sub> content in air within a range of 0 to 10000 ppm CO<sub>2</sub>. The measurement signals generated by the CO<sub>2</sub> transmitter are converted into standard signals of 0 – 10 V. The CO<sub>2</sub> content in the air is determined by a NDIR sensor (non-dispersive infrared technology sensor). The detection range of the CO<sub>2</sub> sensor is calibrated for standard applications such as monitoring of apartment rooms or meeting rooms. Room ventilation on an as-needed basis, improvement of well-being and customer benefit, increased comfort as well as a reduction of operating costs by saving energy.

### TECHNICAL DATA

# S-KFF-U / S-RFF-U-D-F2

## HUMIDITY SENSORS

S-KFF-U

Title	Article No.
S-KFF-U	ZAKKT0051

S-RFF-U-D-F2

Title	Article No.
S-RFF-U-D-F2	ZAKKT0050

The calibrateable duct and room humidity sensors S-KFF-U, S-RFF-U-D-F2, accuracy class  $\pm 3\%$  r.H., measures the relative humidity of air. The humidity transmitter converts the measurand humidity into standard signals of 0 – 10 V or 4...20 mA. This humidity sensor is applied in non-aggressive dust-free ambiences in refrigeration, air conditioning, ventilation and clean room technology. Relative humidity (in % r.H.) is the quotient of water vapour partial pressure divided by the saturation vapour pressure at the respective gas temperature. These measuring transducers are designed for exact detection of humidity. A digital long-term stable sensor is used as measuring element for humidity measurement. Fine adjustment by the user is possible.

## TECHNICAL DATA

Type	S-KFF-U	S-RFF-U-D-F2
Measuring range, humidity	15-90 % RH	Jumper selection: 20-90 % RH/0-60 % RH/0-80 % RH/0-100 % RH

# UG3A4O

## SMOKE DETECTOR

Title	Article No.
UG-3-A4O incl VR-0,6M	ZAKKT0110

Ug3a4o has been developed to detect smoke in ventilation ducts and combines a smoke detector and an adaptor system where both tube and housing are specially designed for optimum airflow through the smoke detector. The venturi pipe is made of aluminium and can easily be shortened to suit the diameter of the duct. Hole diameter is 38mm. For insulated or circular ducts - use the mounting bracket, hole diameter is then 51 mm.

### APPROVALS

- › UG-3-A4O: VdS (Germany);
- › Detector head: EN-54-7;
- › Relay output: Potential free;
- › Smoke alarm relays: Two changing contacts 250V, 5A;
- › Adaptor housing: ABS;
- › Protection: IP54;
- › Air sampling tube: Aluminium;
- › Standard length 0,6 m. Hole diameter 38 mm.

### TECHNICAL DATA:

Supply voltage	24V AC/DC ±10%
Detector type	Optical UG-3-A4O
Max. power consumption	165 mA
Operating temperature	-10°C to +55°C
Maximum humidity	99% RH
Duct air velocity range	Approx. 0,2 to 20 m/s

# IR24-P / IR24-PC

## PRESENCE DETECTORS

IR24-P

Title	Article No.
IR24-P	ZAKJT019

IR24-P is a presence detector designed for automatic ventilation control of HVAC systems. It uses infrared light. The detector has a potential-free change-over relay for activation/deactivation of for instance a fan-coil controller. It saves money and gives higher comfort in premises requiring forced ventilation for shorter periods of time, such as conference rooms, assembly-halls etc.  
The unit can be wall or corner mounted with a 110°, 15m detection range.

IR24-PC

Title	Article No.
IR24-PC	ZAKJT020

IR24-PC is a 360° presence detector for automatic ventilation control of HVAC systems. It uses infrared light. The detector has a change-over output for activation/deactivation of a fan-coil controller.

### TECHNICAL DATA:

	IR24-P	IR24-PC
Type	Dual element	
Infrared sensor		
Supply voltage	24 ± 2 V AC/DC	
Detection range	15 x 15 m, 110° angle	Height x 2.5 = diameter coverage, 25°
Power consumption	5 mA at 24 V AC	15 mA at 24 V AC
Output	200 mA, 24 V AC/DC, potential-free change-over relay	
Ambient humidity		Max. 95% RH
Temperature range		-20...+50°C
Protection class		IP20
Mounting	Ceiling mounting	
ON-delay:	0, 10, 30, 60, 300 or 600 s (selectable)	
OFF-delay	10, 60, 300, 600, 1200 or 1800 s (selectable)	
Dimensions	(HxWxD) 112 x 66 x 45	Ø110mm x 44mm

# Patrol\_701

## MOTION DETECTOR

Title	Article No.
Patrol_701	ZAKJT021

Passive infrared detector Patrol 701 with dual element pyrosensor, was designed for use in electronic alarm. The device detects intrusion by determining changes of energy spectrum in infrared areas. It emits no radiation and is harmless for humans and animals. Automatically chooses and counts the levels of the entering impulses, according to the strength of the signals acting on the detector.

TECHNICAL DATA:	
Detection speed range	0.3 to 3.0 m/sec
Power input	8.5 - 16VDC
Current consumption	In stand by mode: 11.5mA In alarm mode with LED on: 10mA In alarm mode with LED off: 7mA
Pulse mode adjustable	Automatic
Alarm period	3 sec
Maximum detection range	18 m
Relay output	60V; 120mA; 16 Ohm
Warm up period	40 sec
Reset time	5 ± 1 sec
Light immunity	no less than 10000 Lux
Temperature range	- 30°C... + 50°C
Storage temperature range	- 40°C... + 80°C
RFI immunity	30 V/m in range from 10 to 1000 MHz
EMI immunity	50 000 V
Dimensions	93mm x 66mm x 46mm
Weight	85 g

# SPD-G-6K0 / S-1141

## PRESSURE TRANSMITTERS

### SPD-G-6K0

Title	Article No.
SPD-G-6K0	ZAKKT0125

The SPD series are very compact dual multi-range differential pressure transmitters. They provide an analogue / digital output for each sensor and eight selectable measuring windows. The transmitters have an implemented state-of-the-art monolithic silicon pressure sensors and are equipped with Modbus RTU communication. The SPD piezoresistive transmitters are calibrated and temperature & pressure compensated. They feature a high degree of reliability and accuracy. Easy manual zero point calibration and an adjustable offset are available for each sensor.

### S-1141

Title	Article No.
S-1141	ZAKKT0047

The SPS is a multi-range differential pressure transmitter with an analog/digital output and Modbus RTU communication. This calibrated pressure transmitter has eight switchable measuring ranges and is equipped with a state-of-the-art monolithic silicon pressure sensor designed for a wide range of applications. The piezo-resistive transducer is temperature and pressure compensated and has a high degree of reliability and accuracy. The sensor can measure air or other non-aggressive, non-combustible gases.

### TECHNICAL DATA

Type	SPD-G-6K0	S-1141
Analog (0-10 VDC/0-20 mA) or digital output (PWM, open collector)	+	
Measuring range	0 to 6000 Pa, automatically switched according to set point	0 to 2000 Pa, automatically switched according to set point
Modbus RTU (RS485)	+	
Operating temperature	10° to 60°C (temperature compensated)	
Accuracy	±3 % of final value (analog voltage output)	
Long-term stability	±1 % per year	
Response time	0,5/1/2/5 sec	
Power consumption	18-34 VDC supply: 20-10 mA (no load) 15-24 VAC supply: 15-10 mA (no load)	

# EKA

## ELECTRIC DUCT PRE-HEATER

Duct heaters are designed to heat clean air in ventilation systems and to preheat air handling units. Corrosion resistant casing with excellent thermal reflectivity is made from AluZinc. Duct connection is with rolled rubber seals, duct heater elements are made from stainless steel. To ensure safety in duct heaters are installed 2 protection thermostats and screw terminals for easy connection. Heaters casings are produced from AluZinc coated steel and heating elements from stainless steel AISI 304. AluZinc casing was selected because for its properties:

- › Good corrosion resistance at high temperatures (up to 315°C).
- › Excellent thermal reflectivity.
- › Good abrasion resistance because of its surface hardness.
- › Durability: under normal conditions the AZ 150 coating grade will protect the steel substrate from corrosion for a minimum period of 15 years.

### **Double overheat protection**

To ensure security in case of fire in all electric air heaters 2 heat protection thermostats are installed:

- › First overheat protection automatically activates if temperature reaches 50°C, then protection disconnects heating elements, until it has cooled. When the temperature falls to the working temperature, heater automatically switches on.
- › Second overheat protection automatically activates if temperature reaches 100°C, then protection disconnects heating elements, until it has cooled. In this case need to figure the cause of the overheating of the heater. Heater needs to be reset manually with the pushbutton on the heaters casing.

### **Duct connection**

For easy duct connection heaters casing is with rolled rubber seals.

### **Heaters with built-in control**

Electric duct heaters with built-in control has installed internal controller EKR-KN which works by algorithm impulse/pause, that enables fine temperature control. Regulator controls load by triacs without moving parts, which causes no-noise commutation.

### **Air velocity**

The duct heaters are designed for a minimum air velocity of 1,5 m/s. If the air flow is lower than 1.5 m/s it can often be activated overheat protection.

### **Circular duct heaters heating elements**

To ensure long service time and quality heating we use heating elements from stainless steel.

Three-phase (3x400V) heaters are installed three-phase (3x400V) heating elements of following power: 1.0kW, 1.5kW, 3kW.

### **MARKING**

## INSTALATION

Heater can be installed in any position (see picture below) except electrical connection box downward. If heater is installed in such way that can be accidental contact with heating elements, protective grill must be installed. Air flow through heater must be not less 1,5 m/s. Heaters can not be installed in explosive and aggressive substances atmosphere. Heaters can be used only for clean air heating. Heaters intended for inside installation.

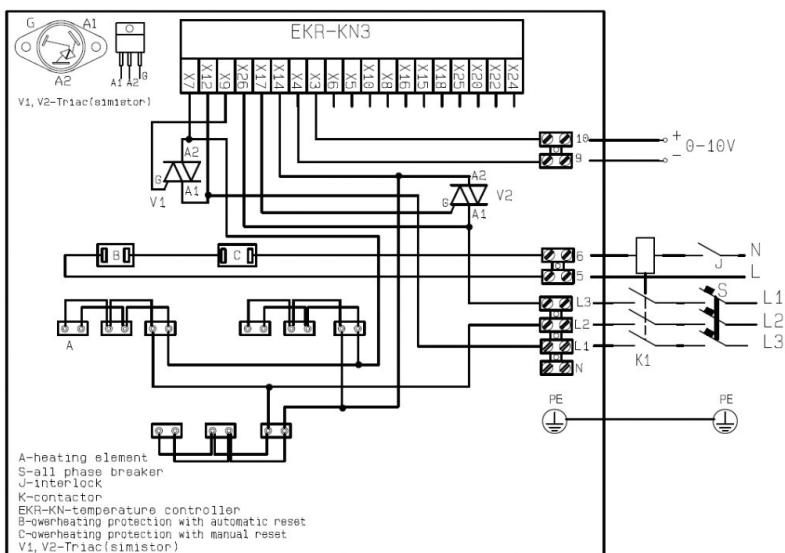

Heaters installation position:

## ELECTRIC DUCT PRE-HEATER

EKS duct heaters are designed to heat clean air in ventilation systems and to preheat air handling units. Corrosion resistant casing with excellent thermal reflectivity is made from AluZinc. Duct connection is with rolled rubber seals, duct heater elements are made from stainless steel. To ensure safety in duct heaters are installed 2 protection thermostats and screw terminals for easy connection.

To ensure long service time of heaters, casings are produced from AluZinc coated steel and heating elements from stainless steel AISI 304. AluZinc for heaters casing was selected for its properties:

- › Good corrosion resistance at high temperatures (up to 315°C);
- › Excellent thermal reflectivity;
- › Good abrasion resistance because of its surface hardness;
- › Durability: under normal conditions the AZ 150 coating grade will protect the steel substrate from corrosion for a minimum period of 15 years.

### **Double overheat protection**

To ensure security in case of fire in all electric air heaters are installed 2 heat protection thermostats:

- › First overheat protection automatically activates if temperature reaches 50°C, then protection disconnects heating elements, until it has cooled. When the temperature falls to the working temperature, heater automatically switches on.
- › Second overheat protection automatically activates if temperature reaches 100°C, then protection disconnects heating elements, until it has cooled. In this case need to figure the cause of the overheating of the heater. Heater needs to be reset manually with the pushbutton on the heaters casing.

### **Duct connection**

For easy duct connection heaters casing is with rolled rubber seals.

### **Heaters with built-in control**

Electric duct heaters with built-in control has installed internal controller EKR-KN which works by algorithm impulse/pause..., that enables fine temperature control. Regulator controls load by triacs without moving parts, which causes no-noise commutation. Following models of heaters are with internal controllers, and there are differences between them: Type NIS – heater control from distance with 0 – 10V signal.

### **Air velocity**

The duct heaters are designed for a minimum air velocity of 1,5 m/s. If the air flow is lower than 1.5 m/s it can often be activated overheat protection.

### **Duct heaters heating elements**

To ensure long service time and quality heating we use heating elements from stainless steel.

Three-phase (3x400V) heaters are installed three-phase (3x400V) heating elements of following power: 1.0kW, 1.5kW, 3kW.

## MARKING

**EKS - NIS - 181 x 66 / 48 \_ IP55 \_ 3x230**

1    2    3    3    4    5    6

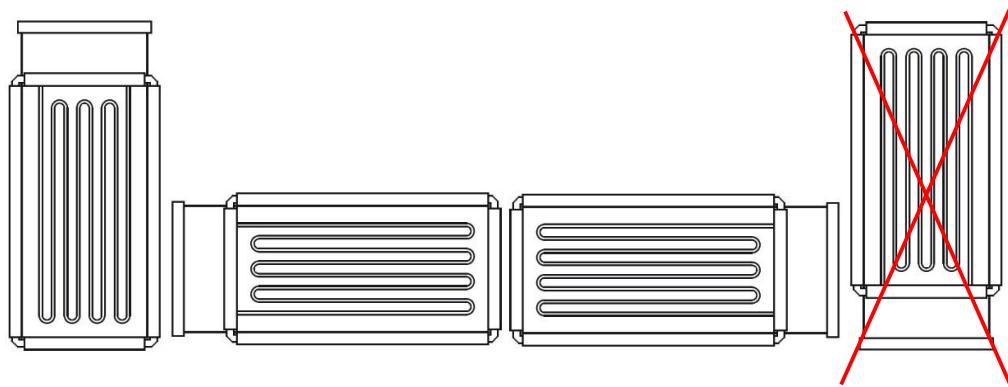

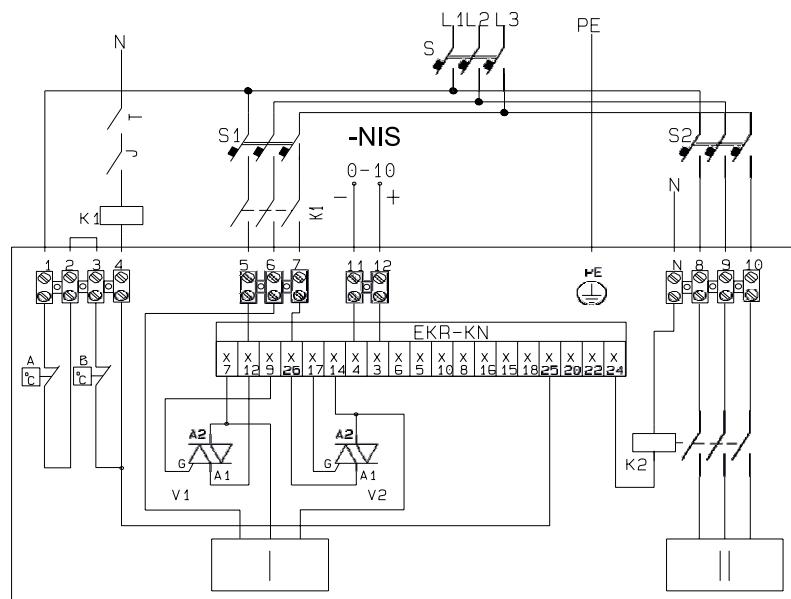

1. **EKS** – duct heater
2. **NIS** – heater type. Type **NIS** – heater control from distance with 0 – 10V signal.
3. **181x66** – heater dimensions
4. **48** – power of heater kW
5. **IP55** – IP class.
6. **3x230** – special voltage

## DUCT HEATER TYPE

Model	Control	Control type
EKS NIS	Built-in controller EKR KN NIS	0-10V control

**INSTALATION**

Heater can be installed in any position (see picture below) except electrical connection box downward. If heater is installed in such way that can be accidental contact with heating elements, protective grill must be installed. Air flow through heater must be not less 1,5 m/s. Heaters can not be installed in explosive and aggressive substances atmosphere. Heaters can be used only for clean air heating. Heaters intended for inside installation.

**WIRING DIAGRAMS**

*I..V - heater steps*

*B - protection from overheating 50°C (automatic),*

*A - protection from overheating 100°C (manually),*

*J - Switch,*

*K1..K5 - Contactor,*

*S..S5 - Automatic circuit breaker,*

*T - Thermostat,*

*V1, V2 - Triac*

*EKR-KN - Control board*

*TR 5 - external potentiometer*

*TJK10K - Temperature sensor*

*X3...X26 - the control board contacts (see. on PCB)*

## ENERGY ANALYZERS

Title	Article No.
Energy analyzer EM23 (PULSE)	ZAKKT0118
Energy analyzer EM210 (PULSE)	ZAKKT0116
Energy analyzer EM23 (PULSE+MODBUS)	ZAKKT0119
Energy analyzer EM210 (PULSE+MODBUS)	ZAKKT0120
Energy analyzer EM24 (M-BUS)	ZAKKT0121

Energy analyzers (EM24) are used for analyzing power line of air handling unit for data transfer.  
Energy meters (EM23, EM210) are used for measuring power consumption of air handling unit.  
Pulse or ModBus is being used for data transfer.

Duct coolers are used in ventilation systems, which require a supply of cooled air. AVA coolers are made of copper tubes and aluminium plates. The housing is made of galvanized steel. Contains a system for condensate drainage.

Heating and cooling units may be selected according to available parameters, with the help of selection programme "Heaters/ coolers", which can be found on web page [www.salda.lt](http://www.salda.lt)

Duct coolers are used in ventilation systems which require a supply of cooled air. RWF coolers are made of copper tubes and aluminum plates. The housing is made of galvanized steel. Contains a system for condensate drainage. Refrigerant is used as the working fluid.

## CIRCULAR DUCT SILENCERS

### MUTE

Title	Article No.
MUTE 315x900	GSOMUTE024

Silencers Mute for circular ducts are manufactured by a unique method that leads to:

- High sound attenuation values – up to 64 dB for d125 silencers.
- Top airtightness – class D (EN 12234:2005).

MUTE silencers easily fit on all types of air handling units with round duct connection.

Construction features and materials:

- Casing and perforated inner net - from galvanized steel (DX51D+Z275). Corrosion class - C2 (ISO 12944).
- Inner material - polyester spunbond (type 488/50).
- Attenuation material - mineral wool. Fire rating class A1 (EN 13501) – non-combustible.

Rectangular duct silencers SSP can be mounted into a system of rectangular air ducts. SSP silencers have good sound attenuation characteristics. Several silencers can be mounted into a rectangular air duct system if there is requirement for bigger noise reduction. The housing is made of galvanized steel and inner casing is made of perforated sheet steel. Mineral wool is used for sound insulation.

SSK 1805-655	GSKSSK757

SSK dampers are used for closing airflow. The dampers are made of aluminium profile with sealing rubber gaskets. Palm driving gear is made of glass-fibre material. Silicon sealing strip provides proper tightness.

Dampers are suitable to be used in the temperature ranges from -40° to +80°C.

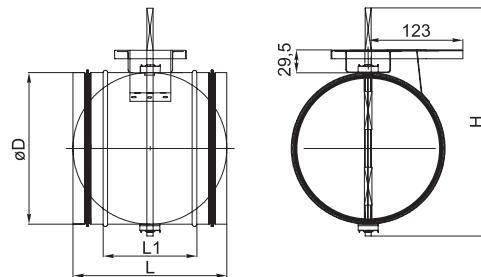

The flange system of these dampers is the same as in the rectangular air ducts and fans, therefore mounting operations are simple.

SKG-A 400	GSKSKG037

Shut-off dampers SKG-A are used for shutting off and controlling airflow. They are easily installed in a circular air duct system. Can be mounted in any position. The casing is made of galvanized steel. Have a rotating, cut-off blade. The blade can be continually adjusted in a 0-90° angle by a motor on the top of damper. The blade of SKG-A dampers has rubber seal that tightens the inside of the damper when it's in closed position. SKG-A shut-off damper is controlled by a motor which is supplied separately.

Filter boxes FDS are used to clean supplied air. They are mounted into a system of rectangular air ducts. Completed with exchangeable FMK-type G4-M5-F7 class pocket filters. In the filter box, a pocket filter is mounted in a horizontal position with pockets facing downwards. The casing is made of galvanized steel. Possibility to connect pressure switch for the filter pollution measurement.

Double Filter boxes BFB are used to clean supplied air. They are mounted straight on the AmberAir Compact unit. Completed with exchangeable FMK-type Coarse 60% (G4), Coarse 85% (M5), ePM<sub>10</sub> 75% (F7) class pocket filters. In the filter box, a pocket filter is mounted in a vertical position with pockets facing upwards. The casing is made of galvanized steel. Possibility to connect pressure switch for the filter pollution measurement.

MPL panel filters with G4/F7/M5 filtration class.  
New type principle of fluting and punctuate sticking of pleats ensures low resistance to air flow and a large capacity for dust. Filter material is made of a synthetic multilayer filter material.

FMK 818x636x430-9 M5	GFIFMK1095

Rectangular pocket filters used for air cleaning. Installed in filter boxes. Filtering material can be G4, M5 or F7 class. The filter frame is made of a Aluzinc 185, 25 mm width.

## MIXING POINT

Title	Article No.
RMG3-0,63-4	PRMG0001

The main function of the mixing point is to control, jointly with the control system, the temperature of supplied water in water heaters. Used for water temperature control in heaters, air curtains, etc. The mixing point is used alongside other devices (shut-off damper, temperature sensor, control system) in order to protect the heaters from freezing.

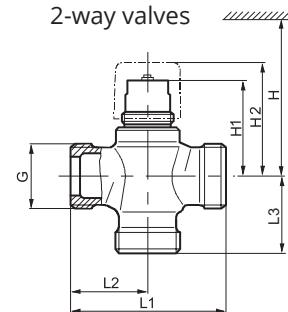

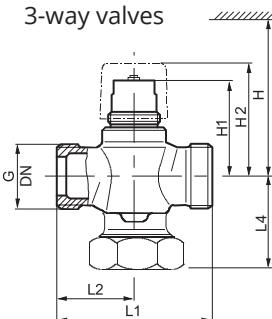

### COMPONENTS

- |   |                             |
|---|-----------------------------|
| 1 | - in, out valves            |
| 2 | - pressure reducing valve   |
| 3 | - backflow preventing valve |
| 4 | - filter                    |
| 5 | - 3-way valve               |
| 6 | - rotary pump               |
| 7 | - pressure gauge            |
| 8 | - thermometer               |

### TECHNICAL DATA

Type	Type of 3-way valve	Recommended actuator for water valve	Type of rotary pump	DN [mm]
RMG3-0,63-4E	VXP45.10-0,6	SSB	UPBAS 25-4	15

## 2 AND 3 WAY VALVES

Title	Article No.
VVP45.10-0.63	PRMV005

Used in ventilation systems to control the temperature of supplied water in water heaters. For fan coil units, small re-heaters and small re-coolers.

VVP45... 2-way	VXP45... 3-way	DN	Connection	kvs A→AB [m³/h]	kvs 1) B→AB [m³/h]	Sv
VVP45.10-0.63	VXP45.10-0.63	10	G½B	0,63	0,44	> 50

1) - Valid for 3-way version only

DN = Nominal size

$k_{vs}$  = Nominal flow rate of cold water (5...30 °C) through the fully open valve ( $H_{100}$ ) by a differential pressure of 100 kPa (1 bar)

$S_v$  = Range ability  $k_{vs} / k_{vr}$

$k_{vr}$  = Smallest  $k_v$  value, at which the flow characteristic tolerances can still be maintained, by a differential pressure of 100 kPa (1 bar)

## TECHNICAL DATA

Medium temperature

1...110 °C, short-term max. 120 °C

Nominal stroke

5.5 mm

Permissible media

low temperature hot water, chilled water, water with anti-freeze recommendation: water treatment to VDI 2035
